

Datasheet Reusable Bevel Protector

Release date : 10-06-2013

Revision date : 18-10-2017

General information

The Reusable Bevel Protector provides the best protection during pipe transport, storage and handling of pipes. The rounded buffer zone absorbs impact forces, leaving the bevel free of damage. The strong clamping system is designed to withstand transport vibrations and all handling procedures. With a new Clamping Clip, the same Bevel Protector can be reused.

Application

The two ends of the Bevel Protector are brought together and the Bevel Protector is positioned in the pipe end by one simple push. A separate Clamping Clip is positioned between the two lips. By hammering on the Clamping Clip, the clip will expand and the Bevel Protector forces itself strongly against the ID of the pipe.

Features

- ✓ Fast and easy fitting and removal
- ✓ Strong clamping
- ✓ Suitable for hook lifting
- ✓ Fitting on stacked pipes
- ✓ Protection of the full circumference
- ✓ Absorbance of large pipe tolerances

Material specifications

Steel : DD 11 (Material nr: 1.0332)

Zinc plated steel: DX51D+Z275-M-A-C (Material nr: 1.0226)

Stainless steel : ANSI 304 (Material nr: 1.4301)

Product range : 225mm – 3.048mm (8.86" - 120")

Commodity / HS code : 73269098

Additional information

- The Reusable Bevel Protector can be supplied with shock-absorbing profile or with a 85°-angle
- Absorbance of large pipe tolerances: 2mm / -2mm (0.08" / -0.08")
- Clamping Clips of different lengths are available for covering even larger pipe tolerances or differences in wall thickness
- Processing tools available for easy application:
 - Third Hand Tool
 - Clamping Tool for Bevel Protector
