Stack Cover

Revision date:
01-01-2025

General Information

The Stack cover is designed to protect stacks of pipes from UV radiation, rain, water, dirt, and dust. Suitable for long-term pipe storage in all weather conditions, this durable cover is securely held in place by the Tie-Down system, preventing any movement and ensuring consistent protection. To use, simply position the cover over a stack of pipes and secure it with the Tie-Down system.

Product specifications		
Product range	On Request	
Application temperature	-30°C / +70°C	(-22°F / +158°F)
Commodity / HS Code	39232910	

Features

- ✓ Provides protection against UV, rain, water, dirt, and dust
- ✓ Suitable for long-term pipe storage in all weather conditions
- ✓ Effective for pipes of all diameters
- ✓ Easily opened for pipe inspection
- ✓ Made-to-order according to customer requirements
